DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 30-34, drawn to a DNA, host cell, vector, and methods of making a protein.

Group II, claim(s) 2, 4, 7-27, 29, 38, 39, 40 drawn to a protein, a composition and an agent.

Group III, claim(s) 35-37, drawn to a method of treatment.

The inventions listed in Groups I-III do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2 they lack the same corresponding special technical feature.

For example, Group I consists of a DNA and Group II consists of a protein. Groups I and II share technical feature since DNA encodes the protein, but Groups I and II lack a special technical feature because any DNA encodes a protein.

Further, Group III refers to a method of treatment.

Under PCT Rule 13.1 applicant is entitled to the first product, method of using and making of said product.

Thus, these inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

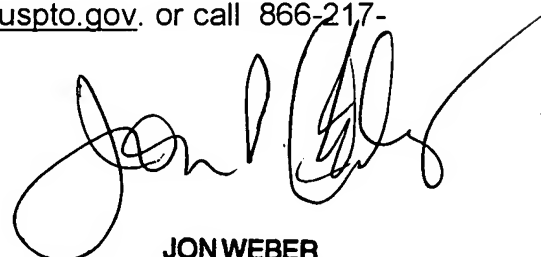

Therefore, the technical feature linking the inventions of Groups I-III does not constitute a special technical feature as defined by PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
